## FAQs

- **What is Recycling Hive (the long version)?**

Recycling Hive is an idea born from a local Facebook community – filled with recycling heroes!

Any of us that care about the environment and sustainability know that recycling is **NOT** the first answer: Rethink, repair, refuse, repurpose, reduce, re-use, recycle.

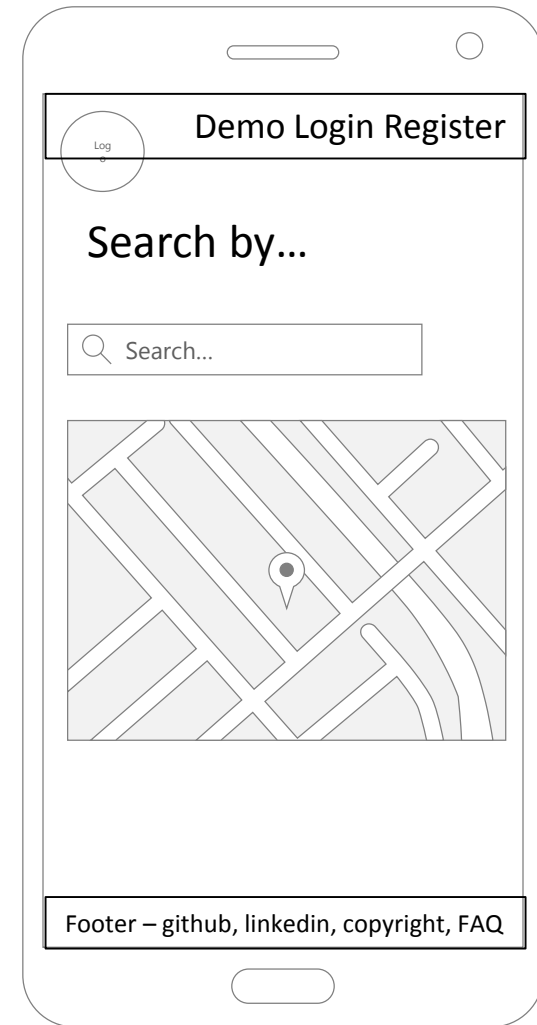

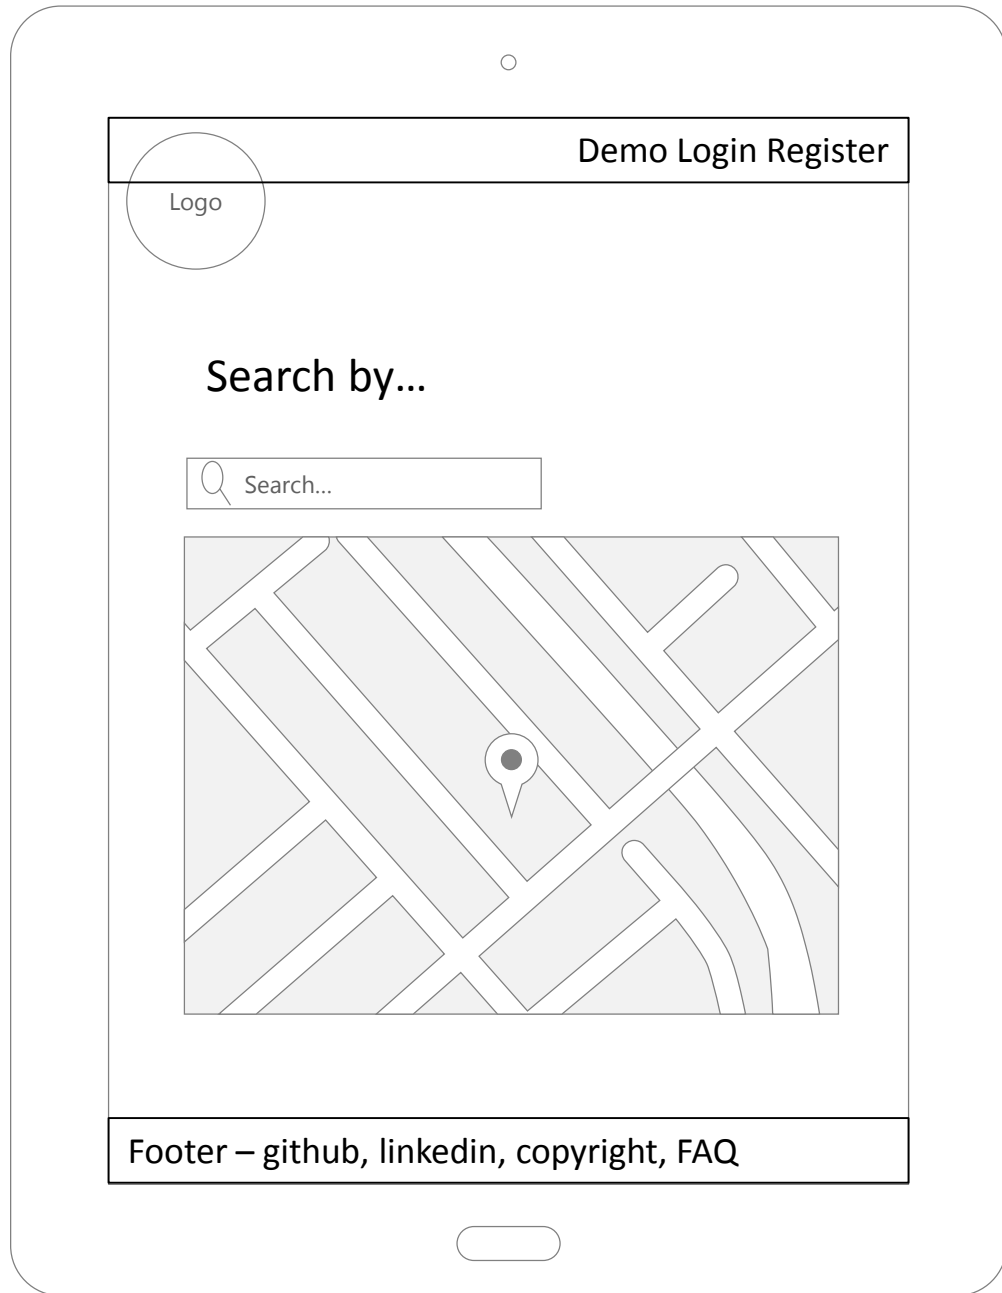

But, it is still an important step in trying to undo the damage we have already done and avoid further damage to our planet.

But recycling is so hard!!!

Most local authorities still have a long way to go with regards to what they accept, and there are a lot of rules which must be adhered to if you want to be sure your recycling bin doesn't end up going to landfill because of contamination (lids left on bottles? Depends where you live!).

Local recycling communities can be a godsend, thanks to caring individuals in your community who collect various recyclables and send them in the right direction -

A wireframe of a desktop login page. It features a header bar with a circular logo placeholder on the left and the text "Demo Login Register" on the right. The main content area is titled "Log In" and contains two input fields labeled "Email:" and "Password:". Below these fields is a "Submit" button. A footer bar at the bottom contains the text "Footer – github, linkedin, copyright, FAQ". The page is framed by a rounded rectangle with a small circle at the top center and a rounded rectangle at the bottom center.
